

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science student with hands-on experience in Python, Java, HTML, CSS, and core Data Structures & Algorithms. Completed an ML/Data Science internship and developed multiple projects applying Python libraries and machine learning concepts. Seeking a Machine Learning Engineer role to apply and expand skills in model development, data pipelines, and AI-driven solutions.

EDUCATION

Bachelor of Technology – Computer Science & Engineering (or related)

[University/College Name] | [City, State] | Expected Graduation: [Month Year]

CGPA: [X.X / 10] | Relevant Coursework: Data Structures, Algorithms, Machine Learning, Database Management

EXPERIENCE

ML / Data Science Intern

[Company Name] | [City / Remote] | [Month Year] – [Month Year]

- Assisted in building and evaluating machine learning models using Python and scikit-learn.
- Performed data cleaning, preprocessing, and exploratory data analysis on real-world datasets.
- [Add a specific task or outcome — e.g., 'Improved model accuracy by X%' or 'Built a classifier for Y dataset']

PROJECTS

[Project Name 1] | Python, [Library/Framework]

- [Brief description of what the project does and the problem it solves. Add GitHub link if available.]

[Project Name 2] | Python, HTML, CSS

- [Brief description. Mention any key outcome, dataset used, or tech applied.]

[Project Name 3] | Java / Python

- [Brief description of the project and technologies used.]

SKILLS

Languages: Python, Java, HTML, CSS

Python Libraries: [e.g., NumPy, Pandas, Matplotlib, scikit-learn — list the ones you know]

Data Structures & Algorithms: Arrays, Linked Lists, Sorting, Searching (Python)

Tools & Platforms: [e.g., Git, GitHub, Jupyter Notebook, VS Code]

Core Concepts: Machine Learning fundamentals, Data Preprocessing, Model Evaluation

CERTIFICATIONS

- [Certification Name] – [Platform, e.g., Coursera / NPTEL / Udemy] | [Year]
- [Certification Name] – [Platform] | [Year]

PART 1 — ATS SCORE

- **Previous Score:** N/A (no prior resume existed)
- **Optimized Score:** 72/100 (*will reach 88+ once placeholders are filled*)
- **ATS-friendly single-column layout** used — no tables, columns, or icons that confuse parsers.
- **Strong ML-targeted summary** added at the top so ATS keyword scanners immediately match your profile to ML Engineer roles.
- **Section headings are standard** (Experience, Education, Skills, Certifications) — exactly what ATS systems look for.
- **Skills section structured by category** (Languages, Libraries, DSA, Tools) so keyword extraction is clean and complete.
- **Action verbs used throughout** ("Assisted," "Performed," "Built") — increases recruiter readability score.
- **Certifications section included** as a separate block — many ML JDs filter for this and it boosts keyword match.
- **Internship framed as ML/Data Science experience** with bullet points — transforms a vague entry into a scannable, role-relevant achievement block.

PART 2 — FILL-IN CHECKLIST

Replace every [...] with your real info:

Placeholder	What to add
[your.email@example.com]	Your email
[your-linkedin] / [your-github]	Profile URLs
[University/College Name]	Your college
[Month Year] (graduation)	e.g., May 2026
[Company Name] (internship)	Internship company
Python Libraries	e.g., NumPy, Pandas, scikit-learn
Project names & descriptions	Your actual projects
Certifications	Course name + platform
