

■ CURRENT POSITION			■ TARGET GOAL	
Status	Student		Role	AI / Software Engineer
Skills	Python · Java · HTML · CSS		Salary	■ 3–25 LPA (India) / \$90–140K (Global)
Strength	Strong programming base — rare for students		Demand	■ Extremely High in 2025–26
Timeline	2 Years to land first job		Key Win	Internship → Full-time Conversion

■ SKILL GAP ANALYSIS				
Area	Current Skill	Target Skill	Gap Level	Priority
Machine Learning	Python basics	scikit-learn, model training	CRITICAL	HIGH
LLM / GenAI	—	Prompt Eng., LangChain, RAG	CRITICAL	HIGH
Data Structures & Algo	Java, Python logic	LeetCode proficiency	HIGH	MED
Backend / APIs	Basic coding	FastAPI / Django, REST APIs	HIGH	MED
Cloud & MLOps	—	AWS/GCP basics, Docker	MEDIUM	MED
Web / Full-Stack	HTML, CSS	React, Node.js or Django	MEDIUM	LOW
Git & Dev Practices	—	Git, GitHub, CI/CD basics	HIGH	MED

■ LEARNING PLAN			■ SUGGESTED PROJECTS	
Month	Topic / Skill	Resource / Practice	Project	Stack
M 1–4	DSA + Python OOP + Git	LeetCode, CS50P, GitHub	AI Resume Screener	Python + LLM API
M 5–8	ML Fundamentals + scikit-learn	Andrew Ng ML, Kaggle	ChatBot for College FAQ	LangChain + RAG
M 9–12	LLMs + LangChain + RAG	DeepLearning.AI, Docs	Stock Price Predictor	ML + FastAPI
M13–16	FastAPI + Cloud + Docker	AWS Free Tier, freeCodeCamp	Personal Portfolio Site	HTML/CSS/React
M17–20	Capstone AI Projects + Portfolio	GitHub + Deployed Apps	AI Study Planner App	Full-Stack + GPT
M21–24	Interview Prep + Job Hunt	NeetCode, Pramp, LinkedIn	Open Source Contribution	GitHub

■ NETWORKING STRATEGY		■ MONTHLY MILESTONES	
Platform	Action	Month	Milestone
LinkedIn	Post projects weekly, connect with engineers	M3	■ 50 LeetCode + GitHub profile live
GitHub	Daily commits, star & contribute to repos	M6	■ ML cert + first Kaggle submission
Twitter/X	Follow AI researchers, share learnings	M9	■ AI chatbot project deployed
Hackathons	Join 2+ per year — great for hiring	M12	■ First internship / freelance project
Communities	Discord: Hugging Face, LangChain, IndieHackers	M15	■ 3 portfolio projects on GitHub
College	Lead AI club, organise workshops	M18	■ Open source contribution merged
		M21	■ 100+ LeetCode, mock interviews done
		M24	■ JOB OFFER ACCEPTED ■

■ IMMEDIATE NEXT ACTIONS — START THIS WEEK	
1	Create GitHub profile — push your Python & Java projects TODAY
2	Solve 2 LeetCode Easy problems daily (Arrays + Strings first)
3	Enroll in Andrew Ng's ML Specialisation on Coursera (free audit)
4	Set up LinkedIn — connect with 10 AI engineers this week

The Plan at a Glance:

- **Months 1-4** — Solidify DSA, Python OOP, Git/GitHub
- **Months 5-8** — Machine Learning fundamentals + Kaggle
- **Months 9-12** — LLMs, LangChain, RAG + first internship
- **Months 13-16** — FastAPI, Cloud, Docker
- **Months 17-20** — Capstone AI projects + portfolio
- **Months 21-24** — Interview prep + job hunt → 🚀 Offer accepted

- **Months 21-24** — Interview prep + job hunt → 🚀 Offer accepted

Your 3 biggest skill gaps to close: Machine Learning, LLM/GenAI, and Git/Dev practices — all very learnable with your existing Python base.

Start this week: Push your Python/Java code to GitHub, solve 2 LeetCode problems daily, and build a simple AI chatbot with a free API.
